

IMU Berlin Einstein Foundation Fellowships

The International Mathematical Union and the Einstein Foundation Berlin offer fellowships to PhD students and researchers primarily from developing countries. Selected fellows will be invited for a research visit to the lively mathematical environment of the Berlin Mathematical School.

Applications are invited for research visits to Berlin lasting from three to nine months. Each application must include:

- Curriculum vitae
- Certificate of last degree and transcripts
- Research statement
- Budget plan including financial needs
- List of publications (if applicable)
- One letter of recommendation (which for PhD student should come from their advisor)

The research statement should explain the research project you intend to pursue in Berlin and should list the Berlin mathematicians with whom you would like to collaborate. Prior contact is not necessary.

Applications must be received at least six months before the desired starting date. The selection committee will meet every three months to award fellowships.
