BMS Summer School for Young Researchers

Discrete Models in Geometry and Mathematical Physics

11–21 September 2017 at TU Berlin

Speakers

Alexander I. Bobenko (TU Berlin)
David Cimasoni (Université de Genève)
Anna Felikson (Durham University)
Vladimir Kazakov (Université Paris-VI)
Franz Pedit (University of Massachusetts)
Dierk Schleicher (Jacobs University Bremen)
Yuri B. Suris (TU Berlin)
Alexander Veselov (Loughborough University)

This summer school combines various current research topics in geometry and mathematical physics, the unifying theme being the role of discrete models and of intelligent discretization methods.

A diverse program of introductory lecture series will treat subjects ranging from integrability of discrete models, discrete differential geometry and its application in computer graphics to conformal dynamics, cluster algebras and discrete models in quantum field theory.

Registration and Funding Requests from 1 April to 31 May 2017:
http://www.math-berlin.de/discrete_models

Organizers:
Alexander I. Bobenko and Yuri B. Suris (TU Berlin)

Contact: summerschool@math-berlin.de
For further information: www.discretization.de/discrete_models

Supported by the DFG via BMS and SFB/TRR 109
